Meet Digiole

Valto Loikkanen

Valto Loikkanen is a long-time entrepreneur and innovation expert who helps build smarter digital tools and systems. At Digiole, he focuses on making technology more connected and useful—like creating AI twins and better ways to manage data. He's worked around the world helping teams and governments bring big ideas to life.

What Makes This AI Different?

Generative models like ChatGPT, Google Gemini, and more, are great as multi-purpose tools, but don't get the full picture. With a closed-repository solution, you are in control of your model and your data.

Generative AI	Closed-Repository AI
Pulls from the open internet	Pulls from curated, trusted sources
Creative but chaotic	Precise, safe, professional
Risk of hallucinations	Reliable, validated information

Prompt Tips!

To keep your AI on the right track

- Be Specific
- Provide Context
- Specify an Output
- Provide Context

Examples:

Your Personal AI:

- Summarize these meeting notes into three key points.
- Draft an email inviting the community to my grand opening.
- Create a client intake checklist for my business incubator program.
- Write a LinkedIn article about my recent fin-tech software release in my voice.

Robin.AI:

- Help me brainstorm customer segments for a new coworking space.
- Guide me through identifying key activities for a wellness startup.
- Validate if my business model idea makes sense for rural entrepreneurs.
- Walk me through building a Business Model Canvas, one section at a time.
